---

Though our offices will be open on a limited schedule during this trip, ALL OF YOUR URGENT & NON-URGENT communications should be sent DIRECTLY TO YOU as the first option.

#### Direct Communication To Your Mobile

There are a number of mobile networks in Tanzania, the most common being Vodacom and Airtel. Distribution is patchy across the country so you may not always be able to connect. Check with your provider to see if voice and/or data is available through the networks and if so, what the charges may be. Some North American carriers offer discounted or free international voice and data services. Others charge a small fortune. To avoid costly surprises, you should check before you leave home.
